

Dear Yury,

Congratulations for your anniversary!

The PD-07 workshop in Kobe is the place we first met when I started my career as a Master course student. So, for me, running frontier so long is really incredible. It is an honor to work together with you now. I am learning a lot from you.

Let's build a good detector and find the  $\nu$ CPV.  
Wishing you good health and happiness.

Sincerely yours,  
Tsunayuki Matsubara (KEK, Japan)
